Education and employment

- 2017 - Postdoctoral researcher at the Donders Institute, Radboud University
Supported by a Veni grant from the Netherlands Organization for Scientific Research
'Understanding cognitive function across the adult lifespan: structure-function interactions in the aging brain'
Major achievements include:
- Using naturalistic stimuli to demonstrate both preservation and reorganization in the aging brain
 - Showing how choices in data pre-processing can have profound impacts on functional connectivity estimates and providing guidelines for future work. This work was awarded the Editor's Choice Award for the best paper in Human Brain Mapping in 2017.
- 2013-2016 Postdoctoral Investigator Scientist at the MRC Cognition and Brain Sciences Unit in Cambridge, UK, affiliated with the University of Cambridge.
Supported by a Rubicon grant from the Netherlands Organization for Scientific Research since September 2014
- Major achievements include:
- Demonstrating that effects of age on functional connectivity vary with mental state. This proves that functional connectivity is both a state and a trait of participants.
 - Pioneering a new measure of multivariate functional connectivity.
 - Evaluating methods for measuring temporal dynamics in functional connectivity.
- 2009 -2013 PhD student at the department of Psychology of the University of Groningen.
Supported by the PhD fund of the Graduate School of Behavioural and Social Sciences, awarded based on an outstanding CV and research plan.
PhD degree was received 09-01-2014 with highest distinction (cum laude)
- Major achievements include:
- Showing for the first time that functional networks become less segregated with advancing age.
 - Linking age-related changes in selective attention to alterations in brain activity and functional connectivity.
 - Demonstrating that functional connectivity remains flexible in older adults.
 - Mastering a large number of different neuroimaging analyses techniques.
 - Publishing 6 first author peer-reviewed papers in high-impact journals.

- 2007- 2009 Research master Behavioural and Cognitive Neurosciences, University of Groningen
Track: Cognitive neuroscience and cognitive modelling
Graduated cum laude (4.0 GPA)
Thesis title: Investigating the relation between the mirror neuron system and mentalizing, using fMRI.
- 2007 -2009 Master Psychology, University of Groningen
Track: Brain and Behaviour
Graduated cum laude (4.0 GPA)
Thesis title: The effect of apomorphine on visual and cognitive functions of patients with Parkinson's disease and visual hallucinations.
- 2004 -
2007 Bachelor Psychology, University of Groningen
Tracks: Brain and Behaviour and Clinical Psychology
Graduated cum laude (4.0 GPA)

Fellowships and Grants

- Internal Donders Centre for Cognition PhD round for Young Investigators (co-applicant) -2019 (€250.000). Titled: 'Understanding aging: an adult lifespan neurocognitive approach towards personalized treatment'
- Veni grant from the Netherlands Organisation for Scientific Research (NWO) - 2016 (€250.000). Titled : 'Understanding cognitive function across the adult lifespan: structure-function interactions in the aging brain'. Like the Rubicon grant below, this is competitive research funding for 4 years based on outstanding track-record and high-impact research plans.
- Rubicon grant from the Netherlands Organisation for Scientific Research (NWO) - 2014 (€163.000; funded two years of postdoctoral research at the MRC-CBU). Titled: 'Network dynamics in the ageing brain'.
- Stipend from the Network of European Neuroscience Schools (NENS), 2010 (€2000; for a one month stay at the Bergen fMRI Group to learn simultaneous EEG-fMRI analyses). Awarded based on a project proposal for a training visit to Bergen.
- PhD Fund of the Graduate School of Behavioural and Social Sciences - 2009 (€203.000 funded PhD project), awarded on the basis of outstanding track record and research plan, as well as an oral presentation.

Awards

- Human Brain Mapping Editors' Choice Award for the best paper in the journal Human Brain Mapping in 2017, as selected by the editors (\$1.000)
- Merit Abstract Award from the Human Brain Mapping Conference 2016 (\$2.000)
- BCN Dissertation award, for best PhD thesis in the school of Behavioural and Cognitive Neurosciences in 2014 (€1.000)
- Second place, NVP Dissertation award, for best PhD thesis in the Dutch Society for Psychonomics in 2014/2015
- MRC Special Award Bonus, for exceptional work at the MRC-CBU (2015; helping evaluation of scanner artefacts) (£1.616)
- Merit Abstract Award from Human Brain Mapping Conference 2015 (\$2.000)

- Cum laude qualification of PhD thesis
- Travel award for the Orienting of Attention ERNI-HSF Science Meeting in Tübingen 2012 (€300)
- Poster award at the School of Behavioural and Cognitive Neurosciences new year's meeting 2012 (2nd place, €50)
- Poster award at the School of Behavioural and Cognitive Neurosciences new year's meeting 2011 (2nd place, €50)
- Poster award at the International Conference on Cognitive Neuroscience 2011 (runner-up)

Research supervision

- Current PhD students
 - Selma Lugtmeijer (co-promotor), she is a PhD student in the group of Roy Kessels, investigating episodic memory and working memory in stroke patients.
- Previous PhD students
 - Shankar Tumati (co-supervisor), he was a visiting PhD student from the University of Groningen to the MRC-CBU, I supervised him during a 6 month project on functional connectivity in Alzheimer's disease.
 - Brieuc Lehmann (co-supervisor), PhD student working at the MRC Biostatistics Unit. I co-supervised him during his first year, when he was working on methods to measure the temporal dynamics of functional connectivity.
- Master Students
 - Patrik Andersson (primary supervisor), using naturalistic stimuli to study aging (RU, CNS master, 2017-2019).
 - Milou van Helvert (co-supervisor), studying the neural mechanism of hand choice using EEG (RU, CNS master 2017-2018).
 - Marleen Eidhof (primary supervisor), studying aging and selective attention using fMRI and EEG (RUG, psychology master 2010-2011).
 - Regina Vlasma (primary supervisor), studying speed of processing and working memory in aging (RUG, psychology master 2010-2011).
 - Maaïke Wouda (primary supervisor), literature review about the influence of meditation, cognitive training and physical training on cognitive functioning of elderly (RUG, psychology master 2010-2011).
- Bachelor students
 - Enja Jung (primary supervisor), she assisted me during the collection of fMRI recordings (RUG, psychology bachelor 2010-2011).
 - Christa Grosse-Schawe, she assisted me during the collection of fMRI recordings (RUG, psychology bachelor 2010-2011).

Teaching

- Lecture and practical session on functional connectivity in the Advanced Neurosciences Techniques course of the Master Cognitive Neuroscience (2019, Radboud University)
- Lecture and practical session on resting state networks in the Quantitative Brain Networks course of the Master Cognitive Neuroscience (2018 & 2019, Radboud University)

- Co-coordinator and workgroup teacher of Brain and Cognition 1 (first-year psychology bachelor 2018, Radboud University). I was responsible for rewriting the course manual, chairing the meetings of work group teachers, editing study materials and teaching two work groups (~15 students each).
- Lecture on brain aging and functional networks, Summer School Healthy Aging 2015 at the University of Groningen. This was a lecture for 15-20 bachelor and master students from various academic backgrounds.
- Lecture on EEG and fMRI analyses techniques to investigate age-related changes in brain function. This was a lecture for 40-50 students who were attending the NEU4EU Translational Neurosciences Summer School 'Ageing Brain' at the University of Groningen (2012).
- fMRI research demonstration, Spring School Healthy Ageing (2012) at the University of Groningen. I demonstrated the basics of fMRI research in a practical session to a group of bachelor students with different academic backgrounds.
- Teaching practical classes on advanced analysis techniques for EEG data (master level, 2011 and 2012, University of Groningen). I explained core concepts of signal processing and data analysis using Brain Vision Analyser software in practical classes with 10-15 students.
- Guest lecture in a course on Research methodology at the University of Groningen (2011). This was a lecture about neuroimaging methods for ~150 bachelor students.
- Teaching practical classes on statistics 2 and 3 in English and Dutch (bachelor level, 2009, 2010 and 2011, University of Groningen). I explained statistical principles and methods in practical classes with 20-30 students. I also graded their assignments.
- Teaching mentor groups (bachelor level, 2009/2010, University of Groningen). I taught academic reading and writing skills to a group of 12 students over the course of their first academic year. I checked and graded their written assignments.
- Student-assistant and coordinator of the methodology shop at the University of Groningen. I gave advice to students and university staff about methodology and statistical techniques. As coordinator I also chaired meetings and coordinated daily affairs at the shop (2006-2009).
- Student-assistant, teaching the course 'Interview with a psychologist' at the University of Groningen (2006-2007). I guided first year students in conducting an interview with a psychologist in their chosen work field, and checked their written reports.

Other professional activities

- Reviewer for numerous high-impact international journals, including Nature Communications, Biological Psychiatry, Journal of Neuroscience, Human Brain Mapping, Cerebral Cortex, Philosophical Transactions of the Royal Society B, PLOS Computational Biology, Neuroimage, Cortex, Plos One, Frontiers in Human Neuroscience, Journal of Cognitive Neuroscience, Neurobiology of Aging, Journal of Alzheimer's Disease and Neuropsychologia.
- Received a certificate of appreciation for exceptional service as an outstanding reviewer for the Journal of Neuroscience in 2018
- Scientific peer review of research grant applications, including NWO research talent applications, NWO Rubicon grants, the Québec-Flanders Bilateral Research Cooperation Program and Radboud University internal funding.
- Co-organized a symposium for the Human Brain Mapping conference 2018, titled: "What can functional connectivity tell us about mechanisms of brain function?"

- Organized a symposium for the 13th International Conference for Cognitive Neuroscience (ICON – 2017), titled: “Functional and structural determinants of lifespan differences in cognition”.
- Postdoctoral representative at the Donders Centre for Cognition (2018-).
- Member of the hiring committees for (1) an assistant professor position at the Radboud University Artificial Intelligence department and (2) a postdoctoral position within the Language and Interaction Consortium.
- Part of the doctoral examination board (corona) for the PhD defense of Max Hinne (2017) and Ronald Janssen (2018).
- Second examiner for master thesis of Patrik Ebel (2017- RU master Cognitive Neuroscience)
- Co-organizing Cambridge Connectome Consortium meetings (2015/2016). These were monthly meetings about a connectivity-related topic.
- Postdoctoral representative in Unit Management Committee of MRC-CBU (2015/2016). I represented the postdocs and raised any issues on their behalf at the committee meetings.
- Wolfson College Research Associate (September 2015 – August 2016). This is an interdisciplinary research college. I attend lectures and attend social events with other researchers from various academic backgrounds.
- Member of the Organisation of Human Brain Mapping (OHBM); Society for Neuroscience (SfN); Dutch Society of Psychonomics (NVP) and the Dutch Neurofederation.
- Co-organizer of EEG-meetings at the University of Groningen (2010/2011). These were three weekly meetings where we discussed recent research findings and practical issues with the EEG equipment at the department. I arranged speakers, wrote the minutes and agenda, I also occasionally chaired the meetings.
- Representative of third year Psychology students at the University of Groningen (2006/2007). I wrote a report reflecting the students’ evaluations of different courses and discussed these with the lecturers.

Skills

Programming: Matlab, R, Python

Research techniques: (f)MRI, EEG and MEG data analyses in SPM, FSL, EEGLab, Fieldtrip

Illustration: Adobe Illustrator, Adobe Photoshop and Adobe Indesign

Languages: Dutch (native), Frisian (native) and English (near native).

Outreach activities

- Finalist in the Radboud Talks competition (2018) – a pitch competition where scientists from all disciplines tell their story in just three minutes for a live audience and jury.
- Jury member for the WON (Wetenschapsoriëntatie Nederland/science orientation Netherlands) manifestation (2017)
- Lecture on during the study day “Your Aging Brain: Use It or Lose It!” of the University of the Third Age in Sevenoaks (UK, 2016). I spoke about effects of physical exercise and mental training on the aging brain and on cognitive function. More than 170 older adults attended the lecture.
- Lecture during the Pint of Science Festival in Cambridge about the aging brain (2014). Pint of Science is a festival where science topics are presented in a pub to a general audience.

- I wrote an article in the Cambridge Centre for Aging and Neuroscience newsletter about networks in the aging brain (2014). This is a newsletter that is available online and is sent to all (~2600) participants of the study.
- Interview for the newsletter of the Behavioural and Cognitive Neuroscience research school of the University of Groningen and the Mindwise Psychology blog, titled: Network connectivity in the aging brain. An interview with Linda Geerligs (2014)
- Article in the University of Groningen newsletter for the media: Ouderen compenseren fysieke achteruitgang hersenen met selectieve aandacht (2014)
 - Published on the web: www.nu.nl, www.ouderenjournaal.nl
- Press release: Oudere hersenen communiceren anders (2012)
 - Published on the web: www.nu.nl, www.gezondheidsnet.nl
 - Interviews on the radio: Hoezo radio on radio 5 and SBS Dutch radio in Australia
- Lecture for the society of higher educated women in Groningen about changes in the brain with healthy aging (2011).
